NRR vs. Ford F-550

NRR Advantages Over Ford F-550 Super Duty:

- Proven Isuzu 4H Family of Engines with B-10 Life of 310,000 Miles. Ford has new 6.7 Liter Engine
- Proven Aisin medium duty transmission versus Ford transmission used in pick up truck applications
- NRR has six wheelbases 109, 132, 150, 176, 200, 212 with longer Cab to Axle options allowing longer bodies, but shorter turning radius
- NRR can accommodate 33% more cargo capacity with body up to 24 ft. in length vs. a maximum 18 ft. on F-Series
- Built from the ground up as a commercial vehicle for a long life. F-550 is derived from a pickup
- NRR 19,500 GVWR versus Ford F-550 19,500 GVWR has same GVWR but NRR has about 1200 more body and payload allowance due to lighter total chassis weight
- Reverse Elliot I-Beam front axle is strong and durable. Mono I Beam used on F-550 varies camber with load, contributing to tire wear
- NRR Front Tapered leaf springs with 8,440 lb capacity provides a smoother ride then F-550 Coil springs
- N-Series rear axle capacity of 14,550 is 7% higher than Ford at 13,660 lbs.
- Tilt cab allows easy engine access. Limited engine access on F-550 Super Duty with very high reach-over to engine area. Some technical procedures on F-550 requires cab to be removed
- Tighter turning diameter curb-to-curb for comparable cab-to-axle ratio (32.8ft./109 in. WB vs. 42.3 ft./141 in. WB) improves maneuverability by 29%
- Wider door opening for easy entry and exit 85 degree vs. 60 degree
- Durable tricote breathable woven seat material is comfortable and long lasting. Solid vinyl on F-550 Super Duty
- Standard tilt and telescopic steering column contributes to driver comfort. Optional tilt steering wheel on F-550
- Grab handle to assist entry and exit contributes to safety on the job. Not available on F-Series
- Longer scheduled maintenance intervals helps reduce downtime and service costs
- Standard fold-down center seat includes convenient work area on NPR; base seat on F-550 is non-folding bench
- Higher frame yield strength contributes to 18% higher capacity and durability (44,000 psi vs. 36,000 psi)
- Standard diesel exhaust brake can contribute up to 30% improved brake life and braking performance. Not available on F-550
- Greater visibility with larger windshield, larger side windows, larger side mirrors and lower dash to improve vision. Front sight line of 8.6 ft. for NRR vs. 23.8 ft. for F-550
- Standard daytime running lamps vs. optional
- Battery box on frame rails of NRR helps extend battery life by removing batteries from hot under-hood area
- 50-state clean idle certification on Isuzu vs. timed idle shut-down after 5 minutes on F-550
- Easier serviceability with in-cab fluid checks vs. Ford's under-hood fluid-checks
- Available limited slip differential provides low-traction solution that's less expensive than Ford's 4WD and better performing than Ford's optional traction control
- Available Vehicle Health Reports allows Isuzu fleet to monitor drivers and vehicle service needs. Not available on Ford
